

Beyond WebSSO

BoF

Beyond WebSSO

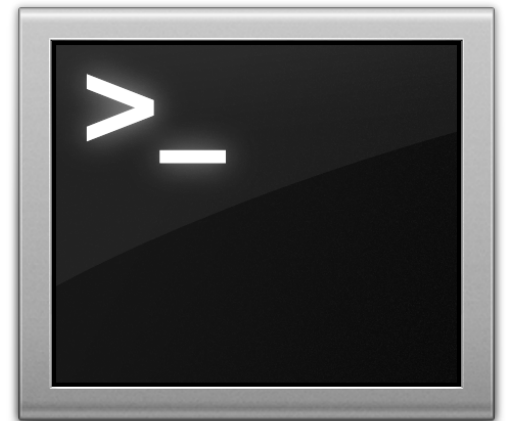

Re-use WebSSO framework versus building something new.

Use case:

- authentication for Application / CLI
- authentication for A/CLI using WS

Internet2: SAML ECP

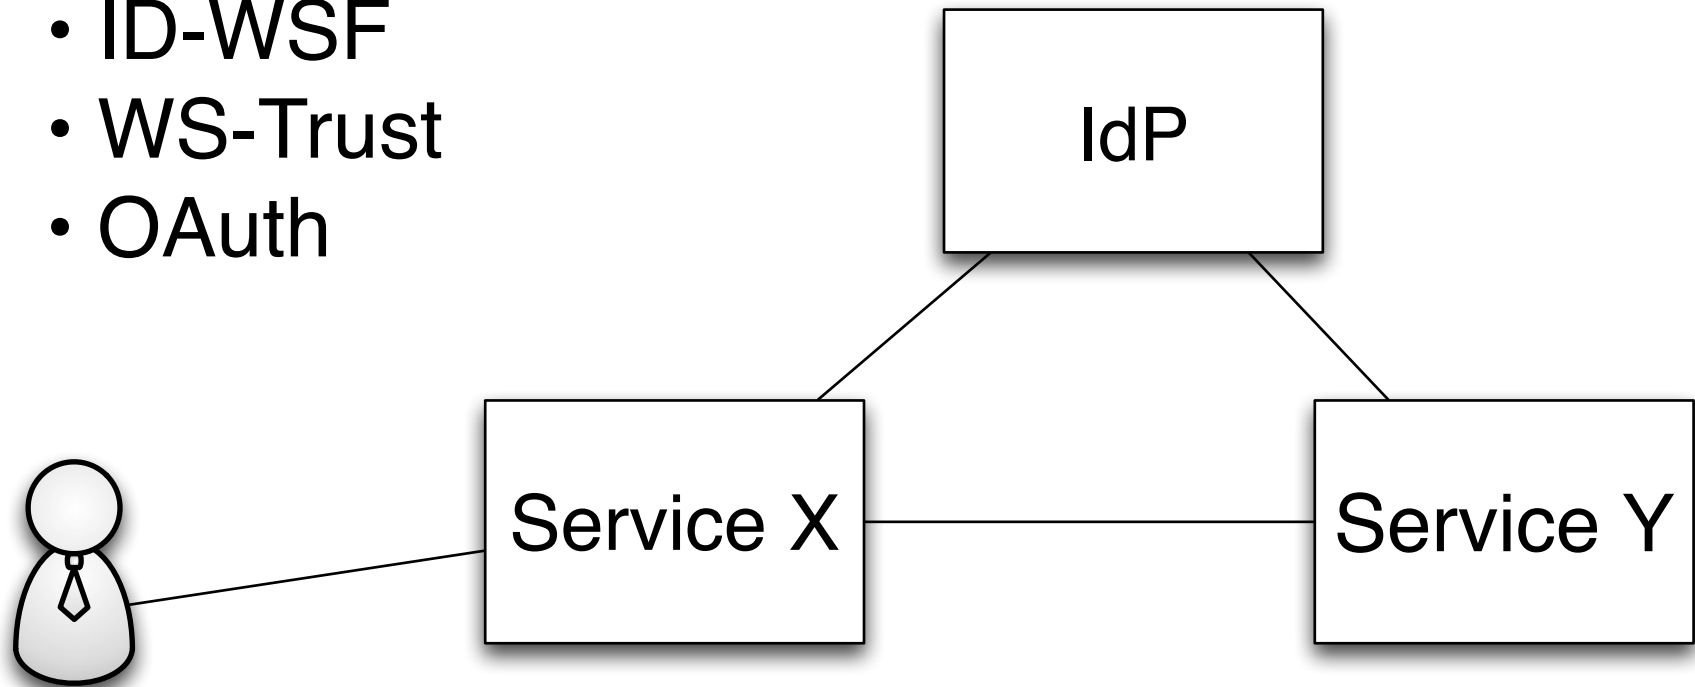

Feide: OAuth

Delegation, or N-tier

Service X talking to service Y representing user A.

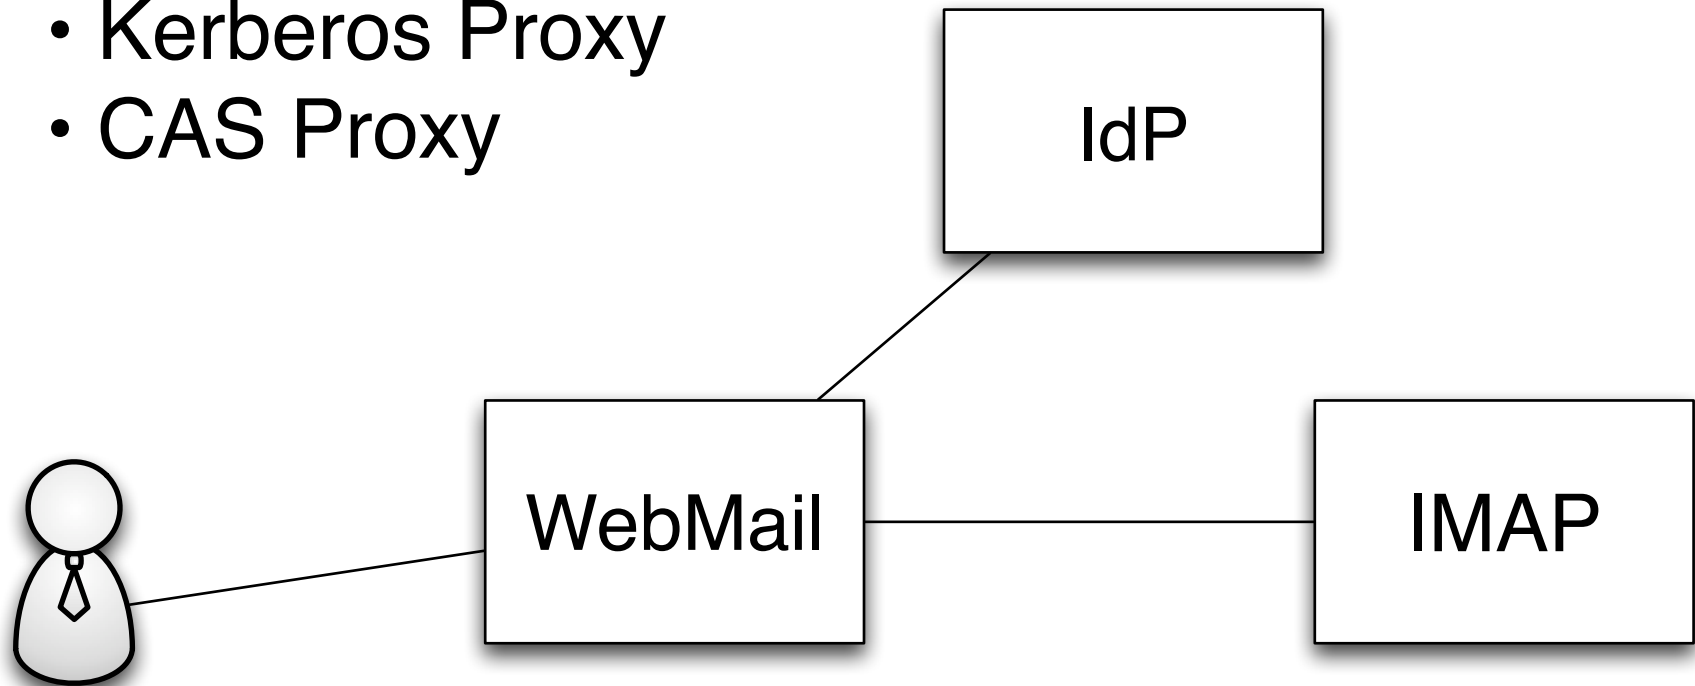

- ID-WSF
- WS-Trust
- OAuth

WebMail

WebMail authenticates with
IMAP

- Kerberos Proxy
- CAS Proxy

More use cases

- SIP - IP Telephony
- Instant messaging XMPP
- SSH access.

Credentials

Exposure of usernames and passwords.

- Creation of password for specific use.
